

## Seminars on Sustainability Program

March 2016 / May 2016

Sustainability Program was organized by the initiative of DPWH, to enhance the technical transfer of the road and bridge maintenance management which was developed during the TCP-II, for concerned engineers of all ROs and DEOs of DPWH. In this program, JICA team also participated the seminar and assist conducting it with counterparts.

In 2016, Seminars on Sustainability Program was held in RO-V on March 14th to 25th, in RO-II on May 16th to 27th, by counterparts of DPWH.

JICA Experts participated the seminar and had the presentation of road and bridge maintenance management. In addition, regarding the bridge inspection technology, JICA and DPWH had the instruction of inspection using the Non Destructive equipment the in OJT.

Since most participants are young engineers who have recently joined the DPWH, it was a valuable opportunity for them to learn road and bridge maintenance management. Many questions and comments were actively issued by participants during the seminar.

Instruction of the Maintenance Management by JICA Experts (RO-V)

OJT of Bridge Inspection with NDT Equipment (RO-V)

Many young engineers participated the seminar (RO-II)

OJT of inspection at Magapit Bridge (Suspension Bridge, RO-II)
