

OJT on Special Bridge Routine Maintenance

August 9-10, 2016 / August 16-17, 2016/ March 1-2, 2017 / July 5-6, 2017

As a part of the output is capability of concerned engineers of RO's/DEO's in target Region (II, III, VII, VIII and XIII) on Special Bridge Maitenance Management is to enhance. One of activity to make it happen is to conduct seminars/OJTs on special bridge maintenance management for concerned engineers of target ROs/DEOs.

The OJT on Special Bridge Routine Maintenance were held in Regional Office II, III, VII and Region VIII. Dated August 9-10, 2016, August 16-17, 2016, March 1-2, 2017 and July 5-6, 2017. The target special bridges for the OJT were Bamban Steel Arch Bridge, Marcelo Fernan Extradosed Bridge, Magapit Suspension Bridge and Agas-Agas PC Box Girder Bridge. JICA donated an equipment, portable generator, pressure washer, oxygen depletion detector and tool Grinder for the OJT. It was a 2-day seminar, 1 day lecture and 1 day actual field training on Bridge. Most of speakers/trainers are counterparts in TCP-III. They lectured the participants on the various topics of

routine maintenance on special bridge and JICA Expert lectured bridge maintenance management during the OJT.

The participants learned aim and importance of special bridge maintenance. OJT was achieved successfully.

Lecture by JICA Expert and DPWH Counterparts

Group Presentation

Actual Field Activity of Routine Maintenance at Bridge Site

Mortar Patching

Cleaning of Expansion Joint

Donation Equipment
