

DEPARTMENT OF PUBLIC WORKS AND HIGHWAYS  
Performance Governance System  
**Measure Profile**

**MEASURE  
A1**

**What is the measure?**

Percentage of hours reduced in travelling the priority corridors (N1 and Nautical Highways<sup>1</sup>)

**What strategic objective is the measure aligned?**

Reduced travel time

**What is the rationale behind the measure?**

This department-level outcome measure validates the effectivity of the outputs that contributes in the reduction of travel time (i.e., road widening, Bypass, Diversion road, etc.) and if such improvements have really made an impact to the traveling public.

**How is the measure calculated? Clarify the terms in the formula**

$$\frac{\text{BASELINE TRAVEL TIME} - \text{CURRENT TRAVEL TIME}}{\text{BASELINE TRAVEL TIME}}$$

**How often is the measure updated/calculated? Indicate policy/law that is applicable.**

Quarterly

**What is the unit?**

Percent (%) improvement in the travel time

**What data is required in calculating the measure? Where/how will it be acquired? Indicate policy/law that is applicable.**

Travel time and delay survey report (including methodology) to be prepared by Planning Service

**What is the basis in setting the targets?**

Travel Time Survey Results/RBIA data

**Who is accountable for the targets?**

Planning Service

**Who is responsible for tracking and reporting the annual accomplishments?**

Planning Service

Corridor	TARGET
