<b>Justification:</b> <ul style="list-style-type: none"><li>• The decrease in unit cost/ increase in the physical target of CW1 – Construction of Concrete Road from 0.360 lane km to 0.872 lane km is due to the following:<ul style="list-style-type: none"><li>◦ Minimal embankment and slope protection is needed due to flat terrain.</li><li>◦ Additional length was considered to maximize the utilization of the allotted budget.</li></ul></li><li>• The inclusion of CW2 – Construction of Drainage Structure along Road (610mm diameter Reinforced Concrete Pipe Culvert with Catch Basin), which accounts to 14.45% of the total cost, to prevent the impounding of water and to protect the road from scouring.</li></ul>
