SUBJECT: NATIONAL ROUTE NUMBERING SYSTEM (RNS)

In line with the Department's efforts to improve planning and management of the National Roads Network, a National Route Numbering System (RNS) is now in place.

The RNS is introduced to simplify and rationalize navigation along those National Roads classified as Primary or Secondary. No route number has been assigned to National Roads classified as Tertiary as these perform local transport functions.

All National Route Numbers are shown on the Department's Web Site which shall also be the official source of this information. This data will be maintained, reviewed and updated by Statistics Division, Planning Service.

National Route Numbering should remain over the medium term. Reviews shall be undertaken on a periodic 6 yearly cycle and must be done on a holistic basis and must consider the road network in its entirety, rather than on a "piecemeal" or "silo" basis.

This order shall take effect immediately.
