DEPARTMENT ORDER

NO.

324

Series of 2002 *11-20-2002*

SUBJECT: **Kilometer Post as Locational Reference Points (LRP) of the DPWH Locational Referencing System (LRS)**

Kilometer posts are a fundamental part of the DPWH Locational Referencing System (LRS) for the National Road Network. Locations of kilometer posts form the basis of data collection on the road network, and are fundamental to many computer applications being implemented in the Department.

The Department has recently conducted a Road Infrastructure Survey that included locations of kilometer posts as Locational Reference Points (LRP's). The location (i.e. coordinates) and photo of these kilometer posts as LRP's are now stored in the LRS-Geographic Information System (GIS) being maintained by the Planning Service. The Department is also implementing a computerized Road and Bridge Information Application (RBIA) that relies on detailed knowledge of the positioning of kilometer posts.

In view of the above, new installation, removal or re-positioning of kilometer post shall be reported immediately to the Planning Service by the Head of the implementing office that undertakes such activities using the form in Annex "A" of this order by providing the following information, viz:

- Column 1 – Road Name (e.g. Maharlika Highway)
- Column 2 – Kilometer Post (e.g. KM 107)
- Column 3 – Event (i.e. new installation, removal, re-positioning or re-labelled)
- Column 4 – Description, include location information (i.e. describe the information label on the kilometer post)
- Column 5 – Date of Modification (e.g. November 12, 2002)

This Order shall take effect immediately and supersedes all previous Department Orders and other issuances or any provision thereof that are inconsistent herewith.

SIMEON A. DATUMANONG
Secretary
