Justifications provided by the requesting Implementing Office:

- Modification is requested because station K1037 is non-existent in the road section Cabungaan-Tabunok -Consuegra Road based on the Road and Bridge Information Application (RBIA.) – K1025+(-863) – K1032+000 (S00079LT).
- Station limits are adjusted to prioritize the road segment needing immediate slope stabilization measures. This will address the necessity for slope protection in the areas susceptible to landslides, stabilize the slopes, prevent erosion, and safeguard people and property.
- The project design requirement entails the construction of a road slope protection structure (Stone Masonry with Steel Sheet Piles), which is crucial for preventing erosion, landslides, and other types of failures that could pose risks to infrastructure and safety. The work items include extensive earthworks (unsuitable excavation), reinforcing steel, structural concrete, Stone Masonry, steel sheet piles, and other necessary components for project implementation. The calculated unit cost is Php 12,644.43 per square meter, with a corresponding physical target of 3,100.18 square meters.

Attached are the following supporting documents: Annual Infrastructure Program (AIP 2025), Form for Evaluation of Modification Request (DPWH-QMSP-03-01 Rev 01), Certificate of Availability of Funds (CAF), BP 202, Geotagged Photos, Location Map, Certificate of Reasonableness of Cost Estimate, Approved Program of Works (POW), Detailed Unit Price Analysis (DUPA), Detailed Engineering Design (DED) Plan, and Straight Line Diagram (SLD).

Having complied with all the documentary requirements under Department Order No. 23, Series of 2023 and other supplemental guidelines, we are respectfully requesting that the above-mentioned project under FY 2025 GAA be modified.
