Total:		₱ 60,000,000.00	Total:		₱ 60,000,000.00

Justification:

- Based on the result of actual survey and Detailed Engineering Design, the Proposed Bridge has a length of 60.90 linear meters. The bridge has a total design width of 15.82 meters, thus the physical target of 963.44 square meters.
- The project includes the following;
 - ✓ The use of Craneway, which contributed 3.20% (₱ 1,861,793.66) of the total project cost.
 - ✓ General Scaffolding and Shoring. Contributed 6.30% (₱ 3,662,596.27) of the total project cost.
 - ✓ The design utilized the use of Structural Steel sheet pile for coffer dam and scour protection for both side of abutments.
 - ✓ The construction of 6 linear meters PCCP bridge approach on both sides.
- The ROW acquisition is omitted from the project since the proposed project already has an existing structure/ spillway which will be removed and replaced with a permanent concrete bridge.

- The derived unit cost is based on the approved Program of Works (POW) and Detailed Unit Price Analysis (DUPA).

Based on our evaluation, the submitted request for modification of the said project is in order; hence, approval hereof is recommended.
